

ALPHARIM®-PLATE

2534.01.

Material:

alpharim® 1500

Colour:

yellow

Note:

alpharim® was specially developed for parting blocks for dies and, in addition to the required functionality, offers new safety aspects

- No brittle fracture – no risk of splintering!
- No tool damage in the event of a collision
- Full-surface shaping possible without fracture
- Easy installation

The alpharim® plates are available in different dimensions and can be cut to the desired lengths and widths.

Physical properties:

Surface pressure up to 12 N/mm² without permanent deformation. The material has a ball hardness of 95 N/mm² in accordance with ISO 2039-1.

2534.01. ALPHARIM®-Plate
